****Sanction for Violation of GDPR****

The National Supervisory Authority has completed in May of the current year an investigation into the operator Vodafone România S.A. and has found a violation of the provisions of Article 3 paragraph (1) and paragraph (3) letters a) and b) of Law no. 506/2004, as amended and supplemented. As such, the operator Vodafone România S.A. has been sanctioned with a fine of 5000 Ron.

The investigation was initiated following a notification of a personal data security breach that was submitted by the operator, based on the provisions of Article 33 of the General Data Protection Regulation.

During this investigation, it was found that invoices related to certain Vodafone customers were erroneously sent to the email addresses of third parties. This led to the processing and unauthorized access to certain personal data of Vodafone customers, such as name, surname, phone number, customer code, and address.

Therefore, the National Supervisory Authority found that the operator did not take appropriate technical and organizational measures to ensure the security of personal data processing, which would guarantee that personal data can only be accessed by authorized persons for purposes authorized by law and to protect personal data stored or transmitted against unlawful processing, access, or disclosure.

On this occasion, we reiterate the necessity of internal training for the employees of each operator regarding the rules of personal data protection, a component of the mandatory organizational measures that fall upon them.
