

COMPLIES WITH REGULATIONS AND

#PROTECTS YOUR DATA

If your company

develops applications

or technological products

And we also help you with these

additional materials

The Spanish Data Protection Agency (AEPD) has designed

various free resources that you can

use depending on the type of data you handle.

The AEPD offers various tools to help you

comply with the Regulation and the Organic Law on

Data Protection 3/2018.

Additionally, it also warns SMEs and freelancers about

the risks of hiring services for compliance with

data protection regulations from companies that offer them at 'zero cost.'

The AEPD provides you with a

website on innovation and

technology where you will find

guides, reports, and technical notes that

will help you develop products and

services adapted to the provisions of

the GDPR from their design.

What is 'zero cost' and why should I avoid it?

Tips for preparing the Record of Processing Activities

What are the main novelties of Law 3/2018?

Guide for the use of video cameras for security and

other purposes

Website for the processing of images for

video surveillance purposes

Facilita

Helps with compliance

If your company

only processes low-risk data

This free tool has been designed to help

companies and professionals who process personal data of

low risk.

It is presented as an online questionnaire with a

maximum duration of 20 minutes, through which companies

and professionals can, first, ascertain through

a series of questions that the data they handle can

be considered low risk and, second, obtain

the minimum essential documents to facilitate

compliance with the regulations.

Risk Analysis and Impact Assessments

If your company

does not only process low-risk data

This free tool aims to assist in

conducting risk analyses and impact assessments for companies that carry out high-risk data processing, such as, for example, those involving health data or mass processing. It can also be useful for those SMEs that need to start conducting Data Protection Impact Assessments (DPIA).
