

PROTECTION OF MINORS ON THE INTERNET

Recommendations for Parents and Guardians

EDUCATE MINORS about the risks to their privacy and safety when using mobile technologies. Encourage the responsible use of technology.

LIMIT the time minors spend online.

LET THEM KNOW that it is necessary to take measures for their own safety.

USE PARENTAL CONTROL. Utilize operating systems, internet providers, and third parties that offer parental control options to monitor the use of mobile devices.

Configure the options, as parental control provides different functionalities such as content filtering, time limitations, application blocking, social media usage details, GPS location, etc.

CHOOSE THE TOOL that best fits your needs and offers guarantees to avoid introducing new risks.

INFORM YOURSELF about data retention periods and ensure that data is not used for purposes other than those you require.

USE BROWSERS, LAUNCHERS, AND APPLICATIONS IN THEIR CHILDREN'S VERSION, which are alternatives that may be less intrusive.

DO NOT FORGET that other connected devices such as Smart TVs or video game consoles are exposed to similar risks.

EXCESSIVE BLOCKING CAN BE COUNTERPRODUCTIVE. Keep in mind that some tools over-block. Keep the possibility of unblocking content open at the minor's request and agree with them on the filters and restrictions.

STAY ALERT AND IN COMMUNICATION WITH YOUR CHILDREN. Remember that parental control tools are not foolproof, so configure privacy and security options appropriately in applications and social networks. Talk to your children and explain why it is also necessary to take precautions on the internet.
